E-Spray

Professional Electrostatic Sprayer

E-Spray is a professional sprayer that uses the principle of electrostatic induction to distribute sanitizing and disinfectant solutions effectively and uniformly on targeted surface areas.

- **Electrostatically charged.**
- **Lightweight, Mobile and easy to use.**
- **Ergonomic in design.**
- **Powered by a lithium ion battery.**
- **Several hours hygienization from one charge.**
- **3 nozzle sizes to suit whatever application is required.**
- **Comes with a hard carry case.**

The spray can reach the whole area you target, even hard to reach places. It is suitable for extended use on uneven surfaces, with hard-to-reach sides and many hidden spots, and where there are several objects that need a 360-degree disinfection. E-Spray allows the user to disinfect areas quickly and effectively saving time, effort and money.

Commonly used in

- **Hotels & Accommodation Services**
- **Retail Outlets - Shops and Malls**
